## Emergency Medical Technician - Paramedic

EMT-Paramedics are advanced providers of Emergency Medical Services and they build on their EMT education and learn more skills such as administering medications, starting intravenous lines, providing advanced airway management for patients, and learning to resuscitate and support patients with significant problems such as heart attacks and traumas.

EMT-Paramedics are often the lead member of a rescue team, with the most training and the most decision making power. This means that the requirements to be a paramedic include strong leadership skills and the ability to perform complex life-saving functions in extremely stressful crisis situations. An EMT-Paramedic must keep a cool head and maintain authority amongst his or her team members in situations where a mistake can mean the difference between life and death.
